

instrument...“made to order” for men in electronics!

ment . . . regardless of temperature and humidity. The durable, lustrous white finish resists scratches, dirt and rough treatment. Numbers, letters and markings are sharp and clear for quick, accurate readings; all inverse scales are printed in red.

CIE's patented* rule features nine conventional scales (A,B,S,T,CI, C,D,L and Ln), *plus* two special scales. The "H" scale (1) is used to solve resonant frequency problems. The "2 π " scale (2) is used

for inductive or capacitive reactance problems, or for any problem involving the factor 2π . This combination of scales was selected on the basis of what men working in electronics told us they needed. It's a combination that permits you to handle all kinds of difficult electronics problems as well as such non-electronic computation as multiplication, division, square roots, logs, etc.

*U.S. Patent No. 3,120,342

On the “flip” side...a unique decimal point locator **plus** useful

Men who have used conventional slide rules will quickly see there's something totally new on this side of the rule. It's an ingenious Reactance and Resonance Decimal Point Locator (3). You will find it particularly useful for quickly and accurately locating the decimal point in all problems involving reactance and resonance. (This scale eliminates the need to convert from one unit to another in such problems.)

The Decimal Point Locator uses a nomograph technique and has

a sliding scale and indices instead of a straightedge. The scales are calibrated for mmf, μh , mh, h, c.p.s., kc, mc, X_L and X_C in ohms and M-ohms, with graduations only at major points. Besides indicating the electrical units involved, the Decimal Point Locator also provides rough but usually adequate numerical answers. If you need greater accuracy, the values obtained may be used to correlate more precise figures with the 2π and H scales on the face of the rule. Thus, you can use the CIE Slide Rule as a simple calculator for approximate answers.

formulas and conversion factors!

or as a regular slide rule for more accurate answers.

The "flip" side of CIE's Electronics Slide Rule also contains many useful formulas (4) for Fahrenheit-Centigrade Temperature Conversion, Ohms Law, Formulas for AC and DC Circuits, Frequency and Wavelength, Reactance, Resonance, Coupled Inductance and Efficiency. In addition, it has 18 commonly-used conversion factors (5) for instant reference.

And, with every CIE Slide Rule...this handsome leather carrying case!

Here's a special bonus: The CIE Slide Rule Case is made of genuine top-grain leather that's doubly reinforced at the "wear" spots. This sturdy case has a heavy-duty plastic liner, plus a removable belt loop for convenient carrying. It's a high quality case that provides ample protection for the precision instrument it was designed to carry.

An exclusive CIE "extra"...a practical instruction

This amazing program will enable you to solve complex problems in seconds

Now that you've seen the Electronics Slide Rule, take a look at the other half of this amazing offer. Four AUTO-PROGRAMMED lessons, complete with illustrations and examples, make learning faster, more effective, and interesting. You'll master hundreds of short-cuts . . . soon be solving complex electronics problems with speed and accuracy you never dreamed possible! Each lesson consists of small, "bite-size" segments plus examples and practice problems; there's also an examination you can send in for grading and consultation by CIE's expert instructors. And, when you complete your Instruction Course, you'll receive a handsome Graduation Certificate as evidence of your newly-acquired skill.

Part I Serves as a self-training course and handy refresher in proper slide rule procedure. Multiplication, division and interpolation are just a few of the sections covered. 14 sections with 130 practice problems.

Part II In addition to reciprocals, square roots and proportion, this lesson shows you how to use the slide rule for blending multi-step problems into one smooth operation. 10 sections with 149 practice problems.

Part III Explains use of special electronics scales, the Reactance and Resonance Decimal Point Locator, and trigonometric functions. 12 sections, 128 practice problems.

Part IV Right triangle applications plus summary of common formula settings and special 16-page appendix on the use of the Ln scale. 8 sections, 95 practice problems.

course of four **AUTO-PROGRAMMED** Slide Rule Lessons

while others plod along the old-fashioned "pad and pencil" way.

**Sticky
problems
like these
are a "snap"
when you use
CIE's
Electronics
Slide
Rule!**

- Q.** What is the maximum current that a 2-watt, 4800 ohm resistor can carry without being damaged?
- A.** 20.4 ma (requires one slide rule setting and 15 seconds to work).
- Q.** What size inductor must I use with a $38 \mu\mu f$ (pf) capacitor to build a tank circuit that will tune to 2360 kc?
- A.** 0.12 mh (one setting, 20 seconds. Slide Rule reads answer directly in mh or μh with decimal point correctly located . . . no need to convert from one unit to another, no complicated formula to remember).
- Q.** If the input to an amplifier is 0.032 watts and the output 12 watts, what is the gain of the amplifier in decibels?
- A.** 25.7 db (one setting, 20 seconds).
- Q.** What size cathode bias resistor should I use to produce 6 volts bias if plate current is 120 ma and screen current is 20 ma?
- A.** 43 ohms (one setting, 12 seconds).

Thousands call the CIE Slide Rule "the most useful, practical"

Example No. 1: using the 2π scale to solve a reactance problem . . . Find accurately the reactance of a 60 mh choke coil at 5,000 kc. Solution . . . See illustration.

- (1) Set the Hairline over 5,000 (which is the frequency) on scale $(f_x) 2\pi$.
- (2) Move the slide so that 60 (which is the inductance) on scale $(L_x \text{ or } C_x) \text{ CI}$ is under the hairline.
- (3) Opposite the index of scale $X_L \text{ or } f_r - C$, read 1,885 (which is the inductive reactance) on scale D.
- (4) Use the Decimal Point Locator scales on the back of the rule to obtain 1.5 megohm as the approximate reactance value.

Hence, the accurate reactance of the choke is 1.885 megohms.

Finding that a 60 mh choke at a frequency of 5000 kc has a reactance of 1.885 megohms.

These two examples are taken directly from Part III of the Slide Rule Instruction Course. While they are just two of the hundreds of examples included in this course, they demonstrate how this slide rule is used . . . and how you can soon learn to use it in your everyday work.

tool" they have ever used. These two examples show why!

Example No. 2: using the Decimal Point Locator to solve a resonance problem. As you may know, any reading from a slide rule is in absolute form (no decimal). Thus the figures "15" could be 0.15, 1.5, or 15,000. Where to put that decimal point is a real problem . . . even for men with years of experience! Conventional rules have no means of accurately locating decimals. But with CIE's Decimal Point Locator, it's easy to put that decimal point exactly where it belongs. Let's go through a problem to see just how this works:

Approximately what value of capacity should be used with an inductance of $350\ \mu\text{h}$ in order to resonate at $200\ \text{kc}$? Solution . . . Refer to illustration.

- (1) Move the slide so that the slide arrow designated f-kc is opposite 200 on scale f on the lower body of the rule.
- (2) Place the hairline over 350 on scale $L_{\mu\text{h}}$ on the upper body of the rule.
- (3) Under the hairline read 0.003 on scale $C_{\mu\text{f}}$ on the slide. Hence, the answer is $0.003\ \mu\text{f}$.

Showing that for $350\ \mu\text{h}$ to resonate at $200\ \text{kc}$, a capacitance of approximately $0.003\ \mu\text{f}$ is required.

Your assurance of complete satisfaction...

When CIE introduced the electronics slide rule described on the preceding pages, it came as no surprise to the thousands of men who have gained success in electronics through CIE training programs. They know that CIE has a special understanding of what's needed in electronics. As a result, the CIE Slide Rule is an instrument that's *really* useful. And the Instruction Course of AUTO-PROGRAMMED Lessons is an outstanding example of how a man, working on his own, can gain skills and knowledge he will use for a lifetime.

But CIE knows that "seeing is believing." And that's why their Slide Rule with Instruction Course is available to you on a 10-day trial basis. It's also backed by the "Satisfaction Warranty" you see on the next page. It's a "no-risk" offer if ever there was one! So take advantage. Order your CIE Slide Rule today.

Cleveland Institute of Electronics has been a leader in electronics training since 1934, and is an Accredited Member of the National Home Study Council. Over 15,500 students are currently enrolled in CIE electronics courses.

CIE backs their Electronics Slide Rule with this exclusive warranty:

SATISFACTION WARRANTY

The Electronics Slide Rule with Instruction Course is available only from Cleveland Institute of Electronics, and is covered by CIE's exclusive "Satisfaction Warranty." Order it now . . . use it for ten full days. Then, *if you're not completely satisfied*, CIE will refund full payment.

Here's proof
that men who
use the CIE
Slide Rule
are more
than
satisfied!

The Editor of Popular Electronics, Mr. Oliver P. Ferrell, states: "Why didn't someone think of this before? The convenience of having all relevant formulas imprinted on the slide rule saved me time the very first day. The 'refresher course' is a marvel of clarity. I couldn't help being amazed at how many standard formula functions I was performing the hard way."

An electronic technician, Mr. Bruce L. Roth, says: "The topics (in the slide rule course) are explained fully and are easy to understand. Nothing is left to guesswork. All the examples are skillfully presented, extremely interesting and highly practical. I really enjoy working electronics problems on your rule."

The Head of the Electrical Technology Dept., New York City Community College, Mr. Joseph J. DeFrance, exclaimed: "I was very intrigued by the 'quickie' electronics problem solutions. It is an ingenious technique. The special scales should be of decided value to any technician or engineer. Your slide rule is a natural."

The Manager of TV and Radio Training, RCA Service Company, Mr. M. O. Pyle, states: "I am very impressed. I have shown your slide rule to a number of my associates and in each case, their reaction has been most favorable. There is no question about this rule being a natural for men in electronics."

Season's Greetings

November, 1965

Dear Sir:

SAVE \$2.50...ON AN ELECTRONICS SLIDE RULE (A Great New Christmas Gift...Limited Offer)

Treat yourself, or a friend, to a unique Christmas gift that will last a lifetime...an Electronics Slide Rule and Instruction Course. For a limited time only, you can order this outstanding \$19.95 Slide Rule and Course for only \$17.45.

If you are in electronics (or would like to be) this is the only slide rule "made to order" especially for you. And it is available only from CIE. This amazing "computer in a case" will save you time the very first day. It is a professional all-metal, 10" rule that has special electronic scales not found on any other rule.

On the "flip side" an exclusive decimal point locator lets you whiz through reactance and resonance computations. All the common formulas and conversion factors are right at your finger tips...no need to search for other tables and charts.

See for yourself the features of this CIE patented slide rule. Find a comfortable chair and read the enclosed booklet, "NEW...ELECTRONICS SLIDE RULE" carefully. You will see why thousands of people call it "the most useful tool" they've ever seen. For a limited time only...until December 10, 1965...you can order one (or more) and SAVE \$2.50!

The Head of the Electrical Technology Dept., New York City Community College, Mr. Joseph J. DeFrance, exclaimed: "I was very intrigued by the 'quickie' electronics problem solutions. It is an ingenious technique. The special scales should be of decided value to any technician or engineer. Your slide rule is a natural."

But that is not all. Every Electronics Slide Rule comes complete with an Instruction Course of four AUTO-PROGRAMMED lessons. You will soon master hundreds of short-cuts. Those sticky math problems will be a "snap" when you use your CIE Slide Rule. You will be first with the correct answers...while others plod along the old-fashioned "pad and pencil" way!

"The 'refresher course' is a marvel of clarity," says Mr. Oliver P. Ferrell, the Editor of Popular Electronics. "The convenience of having all the formulas imprinted on the slide rule saved me time the very first day. I couldn't help being amazed at how many standard formula functions I was performing the hard way. Why didn't someone think of this before?"...he asked.

(over please)

Each lesson consists of small, "bite-size" segments plus examples and practice problems. There are also four exams, one at the end of each lesson, which you can send in to your instructor for grading. He is always anxious to give you all the personal help you need. When you complete the course, you receive a handsome Graduation Certificate. Many CIE students frame and proudly display their certificate as evidence of their new skill.

As a special bonus, every CIE Slide Rule comes housed in a genuine top-grain leather carrying case. It has a heavy-duty plastic liner, plus a removable belt loop for convenient carrying. The entire package is attractively boxed and makes an ideal, practical gift.

So throw away your pad and pencil! Start working those tough electronics problems the NEW and EASY way. Order your Electronics Slide Rule, complete with four lesson Instruction Course and genuine leather case all for only \$17.45 postpaid.

Please use the enclosed Special Order Card and air mail envelope to order one for yourself. Better order one (or more) for a friend or relative too. Just fill in his name on the card as requested and we will do the rest. The wrapping, Season's Greetings gift card and postage are all on us...immediate delivery!

But don't wait! People tell us that this \$50.00 value is an excellent buy at our low price. Take advantage of this special offer and give yourself or a friend (or both), a Great New Christmas Gift.

This SPECIAL GIFT OFFER expires December 10, 1965. Save \$2.50 on every Slide Rule and Course. Order as many as you like TODAY for only \$17.45 complete.

Season's Greetings,

Carl E. Smith

Carl E. Smith, Founder
and Electronics Consultant

P. S. Give it a 10-day trial! If you are not completely satisfied with your NEW Electronics Slide Rule and Instruction Course, CIE will refund your money in full...no questions asked!

SPECIAL GIFT OFFER . . . SAVE \$2.50

ORDER THIS \$19.95 VALUE NOW FOR ONLY \$17.45.

YES! Please send . . . Electronic Slide Rule(s) with AUTO-PROGRAMMED Course and leather carrying case. I am enclosing \$17.45 for each Slide Rule and Course . . . ship immediately post-paid. (Please check)

- ☐ Send my Slide Rule and Course directly to me at the address to the left.
- ☐ Send one Slide Rule and Course, as a gift, to:

Name (Print) _____

Address _____

City _____

State _____

Zip Code _____

If you want CIE to enclose a gift card, check here ☐ and PRINT your name:

Please use the reverse side of this card for the names and address of others who are to receive Slide Rules and Courses . . . and check here ☐.

190.OM - 233

ORDER THIS \$19.95 VALUE NOW FOR ONLY \$17.45.

LIMITED OFFER.

EXPIRES DEC. 10, 1965.

Mail this order card, with your check, in the enclosed air mail post-paid envelope TODAY to Cleveland Institute of Electronics, 1776 East 17th Street, Cleveland, Ohio 44114. Use your Slide Rule for ten full days. If you are not completely satisfied your money will be refunded in full.
